

duplicate

The graph consists of six yellow circular nodes. Two nodes at the top are connected by a horizontal edge. The left node of this pair is connected to a node below it. The right node of this pair is connected to a node below it and a node to its right. The node to the right of the top-right node is not connected to any other nodes.

duplicate

The graph consists of four yellow circular nodes. A central node is connected to two nodes below it. This central node is also connected to a node to its right.
